

Educational Technology and Mobile Learning

80 Alternatives to YouTube

A list of 80 free video resources that teachers and educators can use instead of YouTube

Med Kharbach

2012

About The Author

Mohamed (Med) Kharbach is a Canadian Certified Teacher working at the Yarmouth Tri-county Regional Schoolboard. He has been teaching for nine years now. He is also a master student in Mount Saint Vincent University, department of education in Halifax. He is working on a thesis about the educational use of emerging technologies in education

Mohamed is also a SEO (Search Engine Optimizer) and web designer. He is the editor and owner of two educational blogs. [Educational Technology and Mobile Learning](#) is where he writes about web 2.0 revisions and provides tips for both students and teachers on how to better implement technology in their classrooms. [Educational Mobile Technology](#) is his second blog where he reviews the best free mobile apps for both iOS and Android.

You can contact Med at med@educatorstechnology.com or use the [contact form](#) at his blogs.

Introduction

There is no blinking the fact that YouTube is one of the best educational video resources online. It has thousands and thousands of learning materials scattered among different educational channels. I am actually working on another ebook where I will be providing most of these channels. I strongly believe in the potential of YouTube and I am also geared towards helping my fellow educators use this inestimable resource to the maximum.

Unfortunately, YouTube is not made just for educational content meaning that the videos found there are not always students friendly. The thing is even when you find a good educational video that you want to share with your students you get frustrated because of the distractive features around it which sometimes amount to irrelevant and indecent content. And even though developers have recently empowered us with some awesome YouTube Safety Tools (I that renders the YouTube video viewing experiencing completely safe through removing the irrelevant suggested video playlists and all the coarse language included in the comments section such as [Quietube](#), [Cleaner YouTube](#), [Viewpure](#), [YouTube Safety Mode](#), [Tubechop](#), and [Safeshare TV](#), still schools are still reluctant to grant access to YouTube inside its settings.

Teachers are still unable to access YouTube in their classrooms and it is really frustrating given the wasted educational benefit we can get from it, however as much as we believe in the use of every kind of technology in education, we are more insistent on finding other alternatives to YouTube. This is the main reason why we have compiled this list of some of the best educational alternatives to YouTube.

Over the last two years, I have been sporadically covering some great video resources that both teachers and students can use in the classroom and now that the need for such tools has become much more pressing, we finally consolidated all of those resources together with some new ones into this eBook.

All the links contained here are valid as of 24 March, 2012. We have tested and tried every single one of them to make sure that there is no 404 errors in them. To access any of these links you just click on the tool title.

The folks in [Educational Technology and Mobile Learning](#) are pretty sure that by the use of these free video resources, users (educators, teachers and to some extent students too) will be able to have an unlimited access to a plethora of educational videos covering hundreds of academic and non academic topics. We are also sure that the collection below has, if not all, then most of the top video resources any educator can think of and in case we have missed any then please let us know of your suggestion using this email : med@educatorstechnology.com.

[SchoolTube](#)

SchoolTube is a great video resource for both students and teachers. It has hundreds of how-to resources, copyright-friendly media, and lesson plans for using video in the classroom. It also allows teachers and students to create their own channels and start sharing student generated videos.

[TeachersTV](#)

TeachersTv is a great resource site for educators . It provides Educational

80 Alternatives to YouTube

www.educatorstechnology.com

video resources, lesson plans, inspiration and ideas to use in classroom. It also supports the professional development of anyone working in school, enabling them to widen their skills, develop their practice, and connect with others in the field. It has an awesome community of educators just like you and me who are ready to offer their help and guide you through your professional development journey.

TeachersTube

Teachers Tube is another great video resource created by teachers for teachers. It provides videos covering a wide range of topics. Some of these videos include lessons plans in action.

Next Vista

Next Vista is an advertising free video sharing site that is run by the Google certified teacher Rushton Hurley. It is a great video resource for teachers having problems accessing YouTube videos in their schools . You can now browse different categories and select the educative videos that answers your educative questions and share them with your students .

Academic Earth

The screenshot displays the Academic Earth website interface, divided into two main sections: "DEGREE PROGRAMS" and "FEATURED LECTURES".

DEGREE PROGRAMS:

- Top Program:** "The USC Master of Arts in Teaching". The image shows a USC building with a red banner that says "earn a degree USC". Below the image, it lists "USC / COURSES FOR CREDIT".
- Bottom Program:** "Master of Science in Nursing Delivered Online". The image shows a Georgetown University building with a blue banner that says "earn a degree Georgetown University". Below the image, it lists "GEORGETOWN / COURSES FOR CREDIT".

FEATURED LECTURES:

- Top Lecture:** "The Future of Globalization". The image shows a man speaking at a podium with a screen behind him displaying "expectations" and "n. and Governm". Below the image, it lists "COLUMBIA / POLITICAL SCIENCE" and "Jeffrey Sachs".
- Bottom Lecture:** "Run Times and Algorithms, Recursion". The image shows a man sitting at a desk. Below the image, it lists "HARVARD / COMPUTER SCIENCE" and "David J. Malan".

Academic Earth is an online repertoire of lectures and courses recorded in videos and organized into different categories. These courses and lectures are recorded from the most reputed American universities such as ; Yale, MIT, Berkeley , Harvard , Princeton, and Standford . Academic Earth has one goal which is that of bringing the best content together in one place and creates an environment in which that content is remarkably easy to use and where user contributions make existing content increasingly valuable.
